Dear Sir/Madam,

We have received news from Romania that the Romanian government are ignoring the wishes of the people in the area of Pungesti and have brought in riot police to forcefully remove people and allow Chevron to proceed with operations.

We are asking you the embassy to immediately call on Romanian government to desist from deploying riot police on its citizens who are democratically and justifiably defending their environment and land from the fracking industry i.e. Chevron.

This situation is being watched internationally and the Romanian government must immediately refrain from using their police service to support a proven, destructive private, industry. The Romanian government must immediately diffuse the situation and respect the wishes of the people of Pungesti who are calling on their government to ban fracking. The people of Romania fighting this industry are fully supported by millions of people all around the world, who will be carefully watching this situation.

We will also be contacting human rights organisations regarding this matter. Please inform us of how you, the Romanian Embassy in Sweden intend on dealing with this serious situation that requires immediate attention and action.

Yours sincerely
Anita Ullmann
Heaven or sHell
